Application:

KALISOP® fine max. 1.0 % Cl is a concentrated potassium and sulphur fertiliser used for the manufacture of compound fertilisers and for straight manual application. It is particularly recommended to increase yield and quality of tobacco and other chloride sensitive crops e.g. vegetables and fruits. Moreover, KALISOP® fine max. 1.0 % Cl is the preferred form of potassium for salt affected soils because it is virtually free of chloride and has a low salt index.

Our product is made from crude potassium salt of natural origin and is permitted for use in organic farming according to the Regulations (EC) No 834/2007 and (EC) No 889/2008.
