The product is to be kept dry and covered with a plastic tarpaulin to protect from moisture. Where bulk product is stored, steel joists and columns should be protected from corrosion, as well as the floor and the walls should be furnished with a protective coating. Wooden walls and roof girders have proved to be particularly durable.

Application:
Korn-Kali® contains the essential nutrients potassium, magnesium, sulphur and sodium in an optimal ratio. All nutrients are water-soluble and immediately available to the plant irrespective of the soil pH. Thus Korn-Kali® is effective in all types of soils and suitable for all chloride tolerant crops.
