• Bulk Density (packed)	≈ 1210 kg/m ³
• Angle of Repose	≈ 30 °

Appearance

- 60er Kali® dustfree may contain a certain amount or colorful mineral particles. Due to the nature of our crude salt this quantity is variable.

Storage

- The product is to be kept dry and covered with a plastic tarpaulin to protect from moisture. Where bulk product is stored, steel joists and columns should be protected from corrosion, as well as the floor and the walls should be furnished with a protective coating. Wooden walls and roof girders have proved to be particularly durable.

Application

- You will find detailed information on our website www.kpluss.com/fertilizer
